

Target Sentence :-

She don't likes to go to the park
because the weather are too cold

Corrected Sentence :-

She **doesn't like going** to the park
because the weather **is** too cold.

ERR calculation : $ERR = \frac{\text{changed words}}{\text{total words}} = \frac{4}{13}$
 $= 0.3076$

so, $ERR \% = 30.77\%$

$F^{0.5}$ score :

$$F^{0.5} = \frac{(1 + 0.5^2)(P \times R)}{(0.5^2 \times P) + R}$$
$$= \frac{(1 + 0.5^2)(0.6923 \times 0.3077)}{(0.5^2 \times 0.6923) + 0.3077}$$
$$= 0.5546$$

here, $P = \text{precision}$
 unchanged
 $= \frac{\text{unchanged words}}{\text{total words}}$
 $= \frac{9}{13}$
 $= 0.6923$

$R = \text{Recall}$
 $= \frac{\text{changed}}{\text{total words}}$
 $= \frac{4}{13}$
 $= 0.3077$

Target Sentence :-

1 She don't likes to go to the park
because the weather are too cold

Corrected Sentence :-

She **doesn't like going** to the park
because the weather **is** too cold.

GLEU calculation :-

$$\text{GLEU} = \frac{\text{Matching n gram}}{\text{total n gram}}$$

$$= \frac{3}{10}$$

$$\text{So, GLEU} = 0.3$$

Flesch-Kincaid Grade level :-

$$\text{Grade level} = 0.39 \times \left(\frac{\text{Words}}{\text{Sentence}} \right) + 11.8 \times \left(\frac{\text{Syllables}}{\text{Words}} \right) - 15.59$$

$$= 0.39 \times \left(\frac{13}{1} \right) + 11.8 \times \left(\frac{16}{13} \right) - 15.59$$

$$= 4$$
